Arguing that U.S. policies promoting the global expansion of civilian nuclear energy are not matched by corresponding effort to assure nonproliferation, Henry Sokolski, Executive Director of the Nonproliferation Policy Education Center and Victor Gilinsky, former member of the U.S. Nuclear Regulatory Commission, will propose several nonproliferation principles for correcting the mismatch. They also will identify modest, initial steps that can be taken now to promote such a correction.

Speakers

Victor Gilinsky
A two-term Commissioner of the U.S. Nuclear Regulatory Commission from 1975-84 under Presidents Ford, Carter and Reagan, Dr. Gilinsky holds a Ph.D. in physics from the California Institute of Technology.

Henry Sokolski
Executive Director of the Nonproliferation Policy Education Center, Mr. Sokolski served as a Deputy for Nonproliferation Policy in the Department of Defense and as a member of the CIA’s Senior Advisory Group. He also served on the Deutch WMD Commission and the Commission on the Prevention of WMD Proliferation and Terrorism and has authored and edited numerous books, including *The Next Arms Race* (Strategic Studies Institute, 2012).

Thursday, December 6, 2012
12:15 PM – 2:00 PM

CNS Seminar Room (D-100)
400 Pacific Street (Corner of Pacific & Franklin)
Monterey (831) 647-4154
